Foxes Den makes every attempt to identify ingredients that may cause allergic reactions for those with food allergies. In addition, we label items with possible allergen-containing ingredients; however, there is always a risk of contamination. Our facility prepares a range of types of foods and does use ingredients in some products that contain nuts, nut oils, wheat and dairy. As a result, trace elements maybe present. There is also a possibility that manufacturers of the commercial foods we use could change the formulation at any time, without notice. Customers concerned with food allergies need to be aware of this risk.
